

All Acne is NOT Created Equal!

Last Updated Tuesday, 21 August 2007

Although acne occurs in people of all ethnicities, there are some key differences for acne sufferers with darker skin.

Currently available acne treatments are similar for all types of blemishes. Darker-skinned acne sufferers, however, have special unmet needs and frequently fall victim to the end result of acne: post-inflammatory hyperpigmentation, those unsightly dark spots that can remain for years after a pimple is gone. Post-inflammatory hyperpigmentation is the skin's response to the angry red blemish, pigmented cells that overproduce melanin, the pigment in your skin.

Any significant redness in dark skin, such as trauma, bug bites, acne (or any other condition that causes redness) can leave behind unsightly brown spots that persist long after the redness is gone. Meridian Acne Therapy System is ideal for darker complexioned individuals because the basis of treatment is this: strong and fast-acting anti-redness herbals remove the angry redness from the pimple. The end result: post-inflammatory hyperpigmentation is prevented.

So many treatments erroneously rely on the concept of "drying the pimple out". This leads to a vicious cycle—the pimple is dried out, leaving behind an overall skin tone that is dull, ashy and unattractive. By relying on harsh conditions, trouble arises when the skin surrounding the pimple also gets dried out and flaky.

The Meridian Acne Therapy System provides a powerful solution for acne sufferers with skin of color! Rather than relying on drying methods to remove the pimple (and destroy your natural skin tone and color), the Meridian Acne Therapy System delivers nondrying, soothing botanicals and anti-aging moisturizers that won't clog pores, to help restore the glow so that your natural bronze radiates.

The Meridian Acne Therapy System is a state-of-the-art, dual-action system that not only gets rid of acne fast, 90% of our users said it improved their skin tone and made them look younger. The powerful and soothing botanical ingredients take away redness quickly so that dark spots are prevented. Because of its powerful blemish control and improvement in skin tone, the majority of users continue to use Meridian Acne Therapy System long after their pimples are gone. Let Meridian take the redness out fast to help you restore your natural bronzed glow, leaving your skin clear and radiant.

Meridian is a product that you and your skin will be glad you tried.
